

## Norwegian Student Exchange

As part of our 3 year European student exchange project 'Water in Our Culture' 2 teachers and 2 students from Govan High visited Norway. They stayed with pupils from our partner school and worked in their school creating a mini film of all the students involved from all our partner countries. This is the second year of this student exchange project where we live and work with teachers and students from Germany, Turkey, France, Gran Canaria and Norway to identify how water affects our culture, traditions and way of life. Already this year we have visited Marseilles and in the 1<sup>st</sup> year of the project all participating countries attended a conferences in Scotland and Gran Canaria.

The students thoroughly enjoyed the activities they participated in during the Norwegian visit which included snowboarding, skiing and sledging as well as meeting the locals (see picture below)! These activities were combined with visits to local points of interest and opportunities to meet local people. The project is funded by the British Council to promote effective citizenship and foster understanding to break down barriers and broaden the horizons of our pupils.
