

PARENTS IN PARTNERSHIP

Family Learning Event
S1 Numeracy Evening

AIMS:

- For parents and carers to develop numeracy strategies to support their child at home.
- To promote and encourage families to learn together.

DESCRIPTION:

Our family learning event was targeted at S1 parents and carers to give them an idea of what kind of strategies we use in the Maths department to teach the four operations (Add, Subtract, Multiply and Divide).

It was an interactive session that lasted an hour and engaged and challenged those in attendance. The attendees took part in answering Maths questions along with surveys asking their opinion.

Feedback from parents :

100% of participants thought the session was useful.

100% of participants said they were either "likely" or "very likely" to use these strategies at home with their child.
